### **WHO NEEDS A WELLNESS PLAN?**

Almost any adult horse can benefit from a Wellness Plan. It's all the preventative care they need to stay healthy, spread out over 12 convenient payments. You're less likely to forget their care on a Wellness Plan. And who can't use the discounts on trip or after-hours fees? Plus, you maintain a relationship with your veterinarian, so you can feel confident about contacting us with routine questions about everyday matters – we already know your horse!

### **WHO SHOULD NOT BE ENROLLED?**

Horses under a year old or broodmares should not be enrolled in a wellness plan. They have vaccine needs that are different from other horses and their care should be addressed individually. If your horse has special vaccine needs, or if you're not sure if a Wellness Plan is right for your horse, contact us. We can help you sort through and decide on the best program for your specific needs. We won't try to sign you up if this isn't something you need, because we want the best care for your horse as much as you do.
